RUSSIAN FORESTRY INVESTMENT POTENTIAL

118 priority investment projects in the field of forest exploitation and wood processing

List of priority investment projects is updated by the Ministry of Industry and Trade of the Russian Federation on a regular basis (Decree No 419)

The main priority criteria: innovation, wood processing integration and sustainability

More than \$13 billion of investment; currently about 50% have been assimilated

Leaders of investment activity – Northwestern, Siberian and Far Eastern Federal Districts

In some areas and regions, the share of the forestry complex in the economy is up to 80%

For investors planning projects worth at least 300 million roubles, order of preference in leasing out forest land for up to 49 years without an auction is provided, as well as a half-price lease payment for forest resources.

Regional benefits: tax deferment, subsidies to refund some part of the interest paid on loans, land parcelling for construction projects

According to a study conducted by the Russian Federal Forestry Agency (FFA) of report at the UN meeting held in 2012, the production of roundwood in Russia will grow from 143 million m³ in 2010 up to 300 million m³ in 2030 under an innovative scenario

Russia's accession to the World Trade Organisation has thrown a number of Russian forestry enterprises into a dilemma: whether to improve the competitiveness of products and develop or change the business profile or terminate activities

The Russian forestry is unable to develop the available forest resources. 50% of the total country's timber is ripe forest that should be cut and processed, however there isn't enough capacity to do that. For example, logging companies in the Far East are capable of processing only 2% of available timber.

Outdated equipment and technologies do not let the industry reach the conversion product yield acceptable for a modern economy. In Russia, 1 000 m³ of industrial wood is used to produce about 238 m³ of lumber (in Canada, 340 m³ of lumber is produced).

These factors determine the urgency and relevance of effective exhibitions and conventions on the subject of woodworking technology and equipment

For 8 years, has promotes modern technologies and innovations in the markets of the main Russian forest and industrial regions – the Central region, Northwest, Siberia and the Far East

BENEFITS OF PARTICIPATION IN TEKHNODREV EXHIBITIONS

SOLVING SALES AND MARKETING PROBLEMS

Opportunities for effective problem solving to increase sales, establish new business contacts, display new products and technologies, perform market research and image building

A PERSONAL DATABASE

Unified database for professional visitors – more than 33,500 contacts of managers, experts, heads of procurement departments and other decision-makers

A HOSTED BUYER PROGRAMME

Personal invitation of key enterprises and investment projects decision makers, a special hosted buyer programme is delivered throughout the year

AN EVENTFUL INTERNATIONAL BUSINESS PROGRAMME

Tekhnodrev network exhibitions are visited by regional delegations with the top management of relevant ministries and agencies, large enterprises and organisations, management of federal power structures - participants and VIP guests of the International Forestry Forums

Over the years the project has grown into a large-scale federal networking event; more than 1,800 companies and organisations from all Russia's regions, CIS and European countries have become regular participants of the network project.

TEKHNODREV NETWORK TOPICS

Equipment and services for forest management and forestry industry

Main and auxiliary process equipment for primary conversion, secondary mechanised conversion and utilisation of wood

Main and auxiliary process equipment for surface finishing

Main and auxiliary process equipment for pre-assembly, assembly and packaging of products

Technical facilities for transporting, warehousing and completing materials and products

Robotics

Machinery and tools for special treatment and special production

Machines, tools and devices for non-productive operations

Portable machines and mechanised devices for processing wood and plastic

Tools and accessories

Machine tooling products

Technical and other means for management of waste wood (wood dust, chips, off-cut, bark), to produce energy from wood fuel

Technical and other means for energy conservation, air-conditioning, environmental protection, occupational safety, fire prevention

Electronic devices for data collection and processing; technical ways and means of control, measurement and adjustment

Packaged supply of equipment and equipping of companies, project financing and leasing services

Complex software applications developed independently of machine manufacturers

Independent engineering and other services for the woodworking and furniture industry

Research institutions, supervisory bodies, educational institutions for the woodworking and furniture industry

Professional forestry literature publishers.

9th International B2B Exhibition

TEKHNODREV

THE FAR EAST

TECHNOLOGY, MACHINERY, EQUIPMENT AND TOOLS FOR FORESTRY, LOGGING, BIOENERGY, WOODWORKING AND FURNITURE INDUSTRY

16–19 April 2015 | Khabarovsk

Under the subprogramme 'Development of forestry in the Far East and Baikal region until 2025', the RF Government set targets for the development of forestry in the Far Eastern Federal, including:

- Fivefold increase of the investment in the forestry sector (up to \$1.5 bln annually)
- Added-value wood conversion share in the region up to 70%
- Increase 3.5 times the commercial production output of forestry companies

Maximum number of contacts with experts in the region!

Experts from more than 3,820 forestry enterprises of the Far Eastern Federal District, Krasnoyarsk Region, Zabaikalye Territory and Irkutsk Region are invited to visit the exhibition. Collocation of wooden construction and bioenergy events will make it possible to increase the number of participants and visitors.

TEKHNODREV the Far East 2014 will be collocated with:

'DalExpoMEBEL. Hardware. Interior 2015' – the 14th of furniture, materials, accessories and components for furniture production and the 'Cottage. Country house. Country house. Real Estate 2015' – the specialised exhibition for design, construction and cottage land improvement that allows bringing more visitors

Co-organiser: and Khabarovsk International Fair

The international exhibition TEKHNODREV the Far East 2015 brings together a set of events:

Bioenergy – The international biofuel exhibition and conference

Wooden Construction – The international specialised exhibition

Technology, equipment, structural elements and materials, finishes and interior, services

Regional forestry exhibition 'Regions of Russia. Forestry complex potential'

Forestry investment potential and integrated development programmes in the regions, regional forestry investment projects

BUSINESS PROGRAMME

2nd Far East International Forestry Forum

Topics: Forest utilisation and logging, woodworking and wooden construction, bioenergy

Far East International Forestry Partneriate

Topics: Development of business cooperation, inter-regional and inter-sectoral relations in the forestry, leasing

Review Contest of the Khabarovsk International Fair Gold Medal

2nd International B2B Exhibition

TEKHNO DREV FURNITURE

TECHNOLOGY, MACHINERY, EQUIPMENT AND TOOLS FOR FURNITURE AND WOODWORKING INDUSTRY

11–14 May 2015 | Moscow | All-Russian Exhibition Centre, Pavilion 75

The TEKHNODREV Furniture is held in tandem with the International Exhibition of Components and Accessories ZOW to formulate a single international exhibition and convention programme 'Furniture Industry'

BUSINESS PROGRAMME

All-Russian Furniture Summit

Matchmaking for the furniture and woodworking industry

Set of presentations of new technologies and equipment

MAIN TOPICS

Woodworking equipment

Production and conversion machines, facing machines, hybrid machines

Industrial equipment

CNC process centres

Presses and installations

Robotics

Tools and accessories

Technical and other means for management of waste wood (wood dust, chips, off-cut)

Electronic devices for data collection and processing; technical ways and means of control, measurement and adjustment

Packaged supply of equipment and equipping of companies, project financing and leasing services

Complex software applications developed independently of the machine manufacturers

Independent engineering and other services for the woodworking and furniture industry

18th International Specialised Exhibition

TEKHNO DREV

TECHNOLOGY, MACHINERY, EQUIPMENT AND TOOLS FOR FORESTRY, LOGGING, BIOENERGY, WOODWORKING AND FURNITURE INDUSTRY

September 30 – October 2, 2014 | St. Petersburg

Northwestern Federal District has the third largest stock of wood in Russia and is a leader in terms of funding involved in wood processing investment projects. The region ranks first in terms of production of biofuels in the Russian Federation (over 30%) NWFD is among the Russian regions with the most developed segment of wooden construction

The proximity of the EU markets, developed transport and logistics infrastructure, including port infrastructure, determine the urgency and relevance of business communications in the upgrade of forestry production capacities and the supply of woodworking technology and equipment

To expand the exposition and the topic area, increase the flow of professional visitors and the buyer potential, since 2013, the TEKHNODREV exhibition is held in tandem with the MIFIC EXPO exhibition for furniture industry suppliers, which made it possible to create a process flow of the forestry and furniture industry and to achieve a synergistic effect. As a result, the number of TEKHNODREV visitors in 2013 was 2,258 specialists

TEKHNO DREV is a set of events covering the full spectrum of forestry from forest management and logging to woodworking and biofuel production:

Bioenergy – The international biofuel exhibition and conference

Wooden Construction – The international specialised exhibition

Technology, equipment, structural elements and materials, finishes and interior, services

Regional forestry exhibition

'Regions of Russia. Forestry complex potential'

Forestry investment potential and integrated development programmes in the regions, regional forestry investment projects

BUSINESS PROGRAMME

16th St. Petersburg International Forestry Forum

Subject: Forest utilisation and logging, woodworking and wooden construction, bioenergy

St. Petersburg International Forestry Partneriate

Subject: Development of business cooperation, inter-regional and inter-sectoral relations in the forestry

ALL-RUSSIAN NETWORK OF WOODWORKING EXHIBITIONS TEKHNODREV

All-Russian Network of Woodworking Exhibitions TEKHODREV was initiated by RESTEC[®] Exhibition Company, one of the leading representatives of the Russia's exhibition and conference market; for more than 23 years, RESTEC[®] Exhibition Company has been actively involved in formation and development of the Russian exhibition business as an independent economic sector.

Regional network of forestry exhibitions and conferences organised by RESTEC[®] Exhibition Company and held in St. Petersburg, Moscow, Khabarovsk, Novosibirsk and Petrozavodsk, as well as participation of RESTEC[®] Exhibition Company in the world's largest forestry exhibition and convention events enables to implement wide promotion projects and attract experts from all regions of Russia and foreign countries to visit and participate in the exhibition and convention events.
